

Best Way to Clean Trash/Recycle Bins

- Empty the bin and move it somewhere you don't mind getting wet and somewhat soapy.
- Turn your bin on its side and spray the inside thoroughly with a water hose.
- In a large bucket, mix your cleaning solution. *Suggested solution:* 4 cups distilled white vinegar (helps deodorizes bin & kill germs) and 1/2 cup of dish liquid (helps loosen & remove dirt).
- Dip a scrubber in the solution and scrub the inside of the bin. Using an extended handle brush/scrubber makes the task easier. If you have excess buildup on the bottom of your bin, pour enough cleaning solution to cover the bottom of the bin and let it soak for an hour.
- After scrubbing your bin, rinse it out and leave it to dry in the sun.
